Never guaranteed - an honest read of the weather and water. Full reasons at https://matthewcoley.site/canepole/index.php?lake=lake-fork

Regulations (TPWD 2026-27)

Blue catfish: Statewide rule - 25 blue + channel combined, no minimum length; only 10 may be 20 in or longer.
Crappie: Dec 1 through end of Feb: no minimum length and every crappie caught must be kept.
Mar-Nov: 10 in minimum. 25 a day.
Bluegill: no bag or length limit on sunfish.

Confirm current rules at tpwd.texas.gov before keeping fish.

TPWD ratings

Bluegill: Good (sunfish, mainly bluegill)
Blue catfish: Excellent (catfish - mostly channel; only a few large blues)
Crappie: Good

Eat-safe advisory (Texas DSHS)

None on file in the DSHS advisory layer. Check dshs.texas.gov/seafood for the current list.

Where the fish are this month

Crappie (Fall): Shallower again, usually no less than 10 ft. Docks hold fish in the top 10 ft (MDC).
Bluegill (Fall): Same deeper cover as late summer, plus shallower cover as water cools.
Blue catfish (Fall): Deeper in fall, following shad. On Texoma, blues returned from the river

in late September-October.
